Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Response to Amendment

Applicant's arguments filed on 10/26/2004 have been considered but they are not persuasive.

I. Applicant respectfully disagrees about the cited passage in the given references.

However, the determination of obviousness is still based upon the Marsh et al. and Chow et al. references as follows.

Regarding Claims 1 and 19, Marsh teaches, analyzing the processed data in relation to at least **one rate plan** of at least one telecommunication service provider and determining at least one proposed rate plan that would save the subscriber telecommunication costs relative to the current rate plan, via use of the usage history table and call detail table; and, produce a report of the at least one proposed rate plan to enable **selection of a best telecommunication service provider and a best rate plan**, that would read on charging the user a flat rate for a period of time; (one rate; col.2; 8-22 & col.16; 53-64) and

Chow teaches, a method for providing a local cordless service comprises the steps of receiving **subscriber neighborhood zone** selection input so that a mobile telephone equipped subscriber may place or receive calls for a fixed rate, for example, per month without having to pay radio frequency air time charges any time they are located within their selected subscribed-to zones, that would read on allowing the user **unlimited access to the wireless communications services during the period of time**. (home... free within that zone; pg.3; 0036 & 0033)

For the above reasons, it is believed that the rejections should be sustained.

Claim Objections

II. Claims 17 and 34 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Allowable Subject Matter

III. Claims 36-73 are allowed based on Marsh et al. in view of Chow et al. because they fails to disclose providing service to the user primarily in limited geographic areas in which the user substantially lives, works, and plays.

The following is an examiner's statement of reasons for allowance:

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Senn et al. (US 6704563) disclose a system for prerating communication events, such as telephone calls, for prepaying customers are described. The systems and methods permit, at the beginning of a communication event, the determination of a time limit for the event based on the available balance in a prepayment account associated with the event.

Kirmse et al. relates to the use of a game server in connection with a messenger server in a multi-user networked computing environment.

Vange et al. disclose an interactive multi-player computer hosted game employs an unstructured telecommunications link, such as the Internet, between a game server and a plurality of game clients.

Art Unit: 2683

Rautila relates in general to interactive games, and more particularly to a multi-player game system using mobile telephones and game units.

Goldberg et al. related to a method and apparatus for automating the playing games such as blackjack in, e.g., a game tournament context so that they can be played continuously and asynchronously by a potentially large plurality of players substantially, and wherein information related to goods and services for sale can be exchanged between players and sponsors of advertisements presented during the playing of a game.

And at the end, Sinclair et al. also related to wireless games, particularly, customizing interactive games with one or more players according to past mobile station activity.

Therefore, all of the above prior art also fails to disclose providing service to the user primarily in limited geographic areas in which the user substantially lives, works, and plays.

Conclusion

IV. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2683

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
